

Key Features & Construction

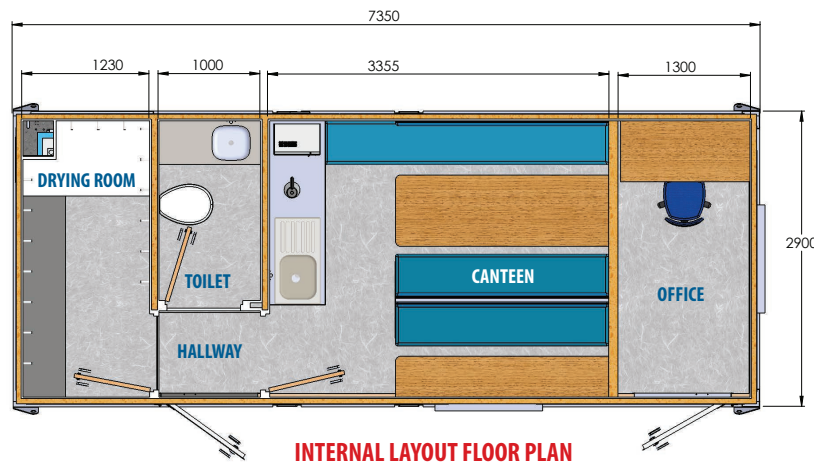

KEY FEATURES

- 20' x 9'6" or 24' x 9'6" Static Welfare Unit
- **Green X Power System** reduces fuel consumption and run time on the diesel generator by up to 75%
- HSE Compliant
- Ready to operate instantly and easily transported
- Strong robust construction and anti-vandal in design
- Canteen can accommodate up to 13 people comfortably
- Available with optional office space
- Motion activated 12V LED Lighting throughout the unit

CONSTRUCTION

- Heavy duty steel exterior with insulated wall panels
- 2 coats of durable exterior paint
- Durable easy clean internal wall panelling
- Heavy duty non slip vinyl flooring throughout
- High security steel doors and window shutters
- High level and low level lifting lugs
- Weight 4500 Kgs (Dry)

- Green X Power System detects power required i.e. use of kettle or microwave etc. and engages the generator.
- The Green X Power System recognises when no power is required and switches off the generator.
- This efficient power management system reduces fuel consumption and run time by up to 75%. This is in comparison to standard static welfare units, resulting in an extended generator life with increased service intervals.

Static Welfare Compartments

SAFE - STRONG - SECURE - SECURI-CABIN

With more than 20 years manufacturing experience, Securi-Cabin Eco Static Welfare Units are a strong, secure and highly economical accommodation option. Each static welfare unit has been developed to incorporate end user needs bringing you an industry leading product.

WHAT OTHER COMPANIES HAVE AS EXTRAS WE HAVE AS STANDARD.

Building on the quality and durability of our static welfare units, we are recognised for our high quality customer service and after sales support. All of this combines to make Securi-Cabin the best option for your static welfare unit needs.

- Carbon monoxide monitor
- Motion activated 12V LED lighting

GENERATOR COMPARTMENT

- Super silent 6KVA diesel generator
- 125L integrated fuel tank
- External access to generator via security steel doors
- Timer control to limit runtime on generator when not required
- Efficient generator performance using the Green X Power System. The System engages the generator only when required which reduces fuel consumption, extends service intervals and longevity of the generator.

What makes Securi-Cabin Static Welfare Units different?

- ✓ Large drying room that seats 4 people
- ✓ Canteen table and seating for 13 people
- ✓ Office accessed from outside with its own separate door
- ✓ Green X Power System can save up to an average of £50 per week on fuel costs
- ✓ Motion activated 12V LED lighting that can be used when generator is not running

AFTER SALES SUPPORT

We fully understand our customers' need for after sales and technical support. Securi-Cabin are committed to ensuring the highest level of customer care as well as technical support in the most timely and efficient manner.

Securi-Cabin Ltd has more than 20 years' experience in the design and manufacture of anti-vandal mobile and static accommodations. At Securi-Cabin, we are passionate about our work and are committed to providing our clients with a world class-product packed full of additional features. **'What other companies have as extras we have as standard'**.

We focus on quality, design and attention to detail, and are committed to continuous improvement and innovation. Our dedicated in-house design team will work with you to achieve a unit that suits your specific business needs. Before manufacturing begins, we work closely with you, our customers, to understand your requirements. We consistently meet and exceed expectations on final units delivered.

Our new 56,000 sq. ft. plant boasts the very latest manufacturing technology and equipment. We use tried and trusted methods of production to achieve your unit. CNC punch presses and bending machines are vital to our process and allow better control over production. We deliver orders on time every time. Our lean manufacturing processes implemented in recent years have seen our manufacturing plant improve overall business performance and ensure efficiencies in production that we pass on to you our customers.

Once your unit has been delivered to you, we don't just leave it there. We are on hand to give support should any element of the unit need replacement during the products lifetime. We provide next day delivery on nearly all replacement parts, and will send a suitably qualified and experienced engineer to install.

Our static welfare units offer unique design features and are the most advanced and economical on the market.

The Eco 13 and Eco 13+ are the latest additions to our static welfare units.
