- Motion activated 12V LED lighting
- Mirror and Toilet roll holder
- Soap and Paper Towel dispenser
- Durable easy clean panelling

ECO 7+

- Fresh water flushing toilet

ECO 7

- Vented recirculating chemical toilet

WHAT OTHER COMPANIES HAVE AS EXTRAS WE HAVE AS STANDARD

What makes Securi-Cabin different?

Retractable Drawbar comes as standard, making the unit more compact and secure when parked. This eliminates the trip hazard risk presented by other welfare units.

Hydraulic Jockey Wheel

The hydraulic jockey wheel makes it easier, faster and safer to hitch and unhitch with the simple push of a button.

Large Internal Area

The Eco Welfare Pod has an extra-large canteen which can comfortably accommodate 7 people.

Aluminium Floor

There is aluminium flooring throughout the unit which is very durable and is suitable for the toughest onsite conditions. The surface is chequered making it non slip.

Retractable Lights

The retractable light guards protect the tail lights. The tail lights folds away automatically when drawbar is fully retracted and opens automatically when drawbar is extended

Automatic Jacking System

Automatic Jacking System for changing wheel Simply place the spacer provided under the rear of the unit and press a button to lift the wheel off the ground.

Retractable Lifting Lugs

The low level retractable lifting lugs can be locked in the 'closed' position from inside the unit to prevent theft. Also used for multiple transport or to facilitate unit placement on complex sites.

Securi-Cabin Ltd has more than 20 years' experience in the design and manufacture of anti-vandal portable accommodation. At Securi-Cabin, we are passionate about our work and are committed to providing our clients with a world class-product packed full of extras. **'What other companies have as extras we have as standard'.**

We focus on quality, design and attention to detail, and are committed to continuous improvement and innovation. Our dedicated in-house design team will work with you to achieve a unit that suits your specific needs. Before manufacturing begins, we work closely with you, our customers, to understand your requirements. We consistently meet and exceed our customers expectations.

Our new 56,000 sq. ft. plant boasts the very latest manufacturing technology and equipment. We use tried and trusted methods of production to achieve your unit. CNC punch presses and bending machines are vital to our process and allow better control over production. We deliver orders on time every time. Our lean manufacturing processes implemented in recent years have seen our manufacturing plant improve overall business performance and ensure efficiencies in production we can pass on to you our customers.

Once your unit has been delivered to you, we don't just leave it there. We are on hand to give support should any element of the unit need replacement during the product lifetime. We provide next day delivery on nearly all replacement parts, and will send a qualified and experienced engineer to install it.

Our welfare units offer unique design features and are the most advanced and economical on the market. The Eco Welfare Pod is the latest tried and tested welfare unit in our range.
